A Technician position in Molecular Biology is available starting November 2018 in the group of Thomas Lecuit at the Developmental Biology Institute of Marseille (IBDM, CNRS UMR7288), Marseille, France. Funding is provided by an ERC grant. The initial appointment will be made for 1 year, with a possible extension to up to 5 years.

We are seeking a highly-motivated candidate with some practical experience in molecular biology with a specialized training as a laboratory technician recognized by a diploma (Bachelor +2 : BTS, DUT,…). Since the working language in the laboratory is English, a rather good understanding in English would be appreciated. The Technician will perform Genetic Engineering in Drosophila using recent molecular biology cloning and CRISPR mediated editing techniques. This position would suit a recent graduate with some practical experience in molecular biology and seeking training in recent Genetic Engineering techniques.

A letter of motivation, a CV and the name(s) of one or two referees should be sent to Thomas Lecuit and Jean-Marc Philippe before 20/10/2018: thomas.lecuit@univ-amu.fr ; jean-marc.philippe@univ-amu.fr
